Appl. No. 10/807,421 Amdt. Dated Jan.19, 2006

Reply to Office Action of December 22, 2005

Amendments to the Claims

This listing of claims will replace all prior versions and listings of claims in

the application:

Listing of Claims:

Claim 1 (original): A frame for a backlight module, comprising:

a stable case comprising a bottom plate, at least three sidewalls

connected to the bottom plate;

a movable case comprising a back rim and two side rims connected to

thereto;

wherein, the movable case is slideably connected with the stable case

by connecting elements.

Claim 2 (original): The frame according to claim 1, wherein the

connecting elements are two orbits defined by the bottom plate, the at least

three sidewalls, and flanges projecting from the corresponding sidewalls

and parallel to the bottom plate.

Claim 3 (original): The frame according to claim 2, wherein the

movable case further comprises a bottom plate connected to the back rim

and the side rims.

Claim 4 (original): The frame according to claim 3, wherein free ends

of the side rims are bent towards the outside of the movable case to form

curve potions.

Appl. No. 10/807,421 Amdt. Dated Jan.19, 2006 Reply to Office Action of December 22, 2005

Claim 5 (withdrawn): The frame according to claim 1, wherein the at least three sidewalls are three outside walls and two inside walls, and the connecting elements are sliding slots defined by the two inside walls and two outside walls.

Claim 6 (withdrawn): The frame according to claim 1, wherein free ends of the side rims are bent towards the outside of the movable case to form curve potions, and the connecting elements are sliding slots defined by the two side rims and the curve portions.

Claim 7 (withdrawn): The frame according to claim 6, wherein free ends of the side rims are bent in the same direction to define curve portion, and the connecting elements are sliding slots defined by the two side rims and the curve portions.

Claim 8 (withdrawn): A backlight module, comprising:

- a light guide plate;
- a light source disposed adjacent to the light guide plate; and
- a frame for receiving the light guide plate and the light source, comprising:
- a stable case comprising a bottom plate, at least three sidewalls connected to the bottom plate;
- a movable case comprising a back rim and two side rims connected to thereto;

wherein, the movable case is slideably connected with the stable case by connecting elements.

Claim 9 (withdrawn): The backlight module according to claim 8,

wherein the connecting elements are two orbits defined by the bottom plate,

the at least three sidewalls, and flanges projecting from the corresponding

sidewalls and parallel to the bottom plate.

Claim 10 (withdrawn): The backlight module according to claim 9,

wherein the movable case further comprises a bottom plate connected to

the back rim and the side rims.

Claim 11 (withdrawn): The backlight module according to claim 10,

wherein free ends of the side rims are bent towards the outside of the

movable case to form curve potions.

Claim 12 (withdrawn): The backlight module according to claim 8,

wherein the at least three sidewalls are three outside walls and two inside

walls, and the connecting elements are sliding slots defined by the two

inside walls and two outside walls.

Claim 13 (withdrawn): The backlight module according to claim 8,

wherein free ends of the side rims are bent towards the outside of the

movable case to form curve potions, and the connecting elements are

sliding slots defined by the two side rims and the curve portions.

Claim 14 (withdrawn): The backlight module according to claim 13.

wherein free ends of the side rims are bent in the same direction to define

curve portion, and the connecting elements are sliding slots defined by the

two side rims and the curve portions.
